

## DRAVINANSHU MISHRA

### Full Stack Developer

Mobile: +91-9651244924

E-mail: [dravinanshu97@gmail.com](mailto:dravinanshu97@gmail.com)

---

### PROFESSIONAL SUMMARY:

- ❖ Having **1.4+ years of experience in MERN Stack Development**, with hands-on expertise in **ReactJS, React Native, NodeJS, ExpressJS, and MongoDB, Mongoose**.
- ❖ Proficient in developing scalable and responsive **full-stack web applications** using modern JavaScript frameworks and libraries.
- ❖ Experienced in **RESTful API development**, integrating **frontend (ReactJS)** with **backend (NodeJS/ExpressJS)** and working with **NoSQL databases like MongoDB**.
- ❖ Knowledge of **state management** libraries such as **Redux Toolkit, React Context**, and asynchronous data fetching using **Axios / Fetch API**.
- ❖ Experience in **component-based architecture, React hooks**, and building reusable UI components for seamless user experience.
- ❖ Strong understanding of **frontend technologies** like **HTML5, CSS3, Bootstrap, and JavaScript (ES6+)**.
- ❖ Experience in **application deployment** using platforms like **Vercel, Netlify, Heroku**, and managing code through **Git / GitHub**.

### WORK EXPERIENCE:

#### **Ariedge.ai, Full Stack Developer**— *6th August 2024 to Present*

- ❖ Working as a **Full Stack Developer**, focusing on **ETL development using Informatica Cloud** for enterprise-level Workday data extraction.
- ❖ Responsible for continuous improvement and enhancement of existing ETL pipelines, ensuring **data accuracy, performance tuning**, and scalability.
- ❖ Participated in **ReactJS and NodeJS-based application module integration** and API consumption wherever required for internal tooling.

#### **CodeTech IT Solutions, Web Application Developer (Intern)** — *1st May 2024 to July 2024*

- ❖ Contributed as a **Web Application Developer Intern**, involved in building and enhancing **ETL workflows using Informatica Cloud**.
- ❖ Developed **Mapping/Workflow/Task Flows** to automate the process of **data extraction, transformation, and loading (ETL)** into SQL databases.
- ❖ Worked on **issue analysis, bug fixing, performance tuning**, and **Continuous Service**

**Improvement (CSI) in ETL processes.**

- ❖ Assisted in basic **frontend/backend development tasks** as part of a full-stack development team, involving **HTML, JavaScript, and basic Node.js**.

## EDUCATION

- **MCA, Integral University, Lucknow, August 2022**
- **7.9 CGPA (79%) in (MCA).**
- **PGDCA, Nehru Gram Bharti University, August, 2019**
- **8.0 CGPA (80%) in PGDCA.**

## Technical Skills

- **Front-End** : **ReactJS, React Native, Redux Toolkit, JavaScript, ES6**
- **Back-End** : **NodeJS, ExpressJS, Restful APIs.**
- **Database** : **MongoDB, Mongoose, PostgreSQL, Sequelize.**
- **Designing** : **CSS, TailwindCSS, Ant Design, Material UI, Formik Form**
- **Others & Tool** : **Axios, JSON, Postman, VSCode, Chrome DevTools.**

## Achievements/Certifications:

- **PGDCA Topper, NGB in University.**

## COMPANY PROJECT

### 1. Ballot Now – Remote Voting System

**Role:** Full Stack Developer

**Technologies:** ReactJS, Node.js, Express.js, MongoDB, JWT, REST API, TailwindCSS, Ant Design, Git

#### Key Responsibilities:

- Developed a secure and user-friendly remote voting web application enabling voters to cast votes digitally from anywhere.
- Designed responsive UI using ReactJS, with state management through Redux Toolkit.
- Implemented authentication & authorization using JWT, ensuring only verified users could access and vote.
- Created RESTful APIs using Node.js and Express to handle user registration, election creation, voting logic, and results.

## 2. Dhaakad Cinema – OTT Platform

**Role:** Full Stack Developer

**Technologies:** ReactJS, Node.js, Express.js, MongoDB, JWT, HTML5 Video, Tailwind CSS, Formik Form

### Key Responsibilities:

- Developed dynamic UI with ReactJS + Tailwind CSS, and implemented state management using Redux Toolkit.
- Handled backend logic in Node.js with Express, including CRUD operations for content management.
- Implemented secure login system using JWT-based authentication and role-based access.
- Created dashboard for admin to manage movies, genres, and user data.

### PERSONLA PROJECT:

## Personal Portfolio Website

**Role:** Full Stack Developer

**Technologies:** ReactJS, Node.js, Express.js, MongoDB, EmailJS, Tailwind CSS, Vercel

**Status:** Ongoing / Completed (update as per status)

### Key Features & Responsibilities:

- Developed a personal portfolio using the **MERN Stack** to showcase skills, projects, and work experience.
- Designed a **modern, responsive UI** using **ReactJS** and **Tailwind CSS**, optimized for desktop and mobile devices.
- Built **dynamic project and experience sections**, populated via **MongoDB** for easy content updates.
- Integrated **contact form** with **EmailJS** to allow direct messaging via email from visitors.
- Created an **admin panel (optional)** for adding/updating projects, blogs, or testimonials.
- Deployed the site on **Vercel** with custom domain integration and Git-based CI/CD pipeline.
- Implemented **dark/light theme toggle**, **animations using Framer Motion**, and SEO meta tags for better visibility.
